

The BML BPMN export provides the ability to export the information contained within BML business models to the Business Process Modeling Notation standard. BPMN is an Object Management Group (OMG) standard that provides businesses with the capability of understanding their internal business procedures in a graphical notation and will give organizations the ability to communicate these procedures in a standard manner. Furthermore, the graphical notation facilitates the understanding of the performance collaborations and business transactions between the organizations.

### **BML BPMN**

---

The BML BPMN export translates the BML HOW model data into the BPMN format that can then be used by business process tools that consume BPMN.

The BML BPMN export is offered as an add-on to BML W5 and is a standalone license.

### **HARDWARE & SOFTWARE REQUIREMENTS**

---

COMPONENT	REQUIRED SPECIFICATIONS
<b>Processor</b>	<ul style="list-style-type: none"><li>• 1-gigahertz (GHz) Intel Pentium-class processor</li></ul>
