BML SPARX SYSTEMS ENTERPRISE ARCHITECT EXPORT

The BML Sparx Systems Enterprise Architect Export provides the ability to export information contained within BML WHO, WHAT, WHICH and HOW business models to Enterprise Architect. The export creates Use Case Diagrams from the related WHAT and WHO objects in the HOW model that can be viewed in Enterprise Architect. Additionally, Class Diagrams are created from the WHICH model that can be viewed in Enterprise Architect. The export currently supports UML 1.3 [XMI 1.1].

The export is generated based on the information sources- BML files and models- selected by the user and can be output in an eXtensible Markup Language (.xml) format. The BML Sparx Systems Enterprise Architect Export is offered as an add-on to the BML Product Suite and is a standalone license.
