

The BML XPDL export provides the ability to export the information contained within BML business models to the XML Process Definition Language standard. XPDL is a Workflow Management Coalition standard to interchange Business Process definitions between different workflow products like modeling tools and workflow engines. XPDL defines an XML schema for specifying the declarative part of workflow.

### BML XPDL

The BML XPDL export translates the BML HOW model data into the XPDL format. This XPDL format can then be used by business process tools that consume XPDL.

The BML XPDL export is offered as an add-on to BML W5 and is a standalone license.

### HARDWARE & SOFTWARE REQUIREMENTS

COMPONENT	REQUIRED SPECIFICATIONS
<b>Processor</b>	<ul style="list-style-type: none"> <li>1-gigahertz (GHz) Intel Pentium-class processor</li> </ul>
