

BusinessGenetics for SAP® Profiling exports information contained within the SAP® Solution Manager application, the SAP® Production system and/or SAP® Business Process Reference Models and provides reports or business models for analysis.

There are three license types. Each license type is connected to one SAP® satellite system. Connections to additional SAP® systems are charged by system.

Time Limited

This license is designed to be used for projects or pilots. The use of the license is limited to 90 days. The 90 day test period begins with the first use of the software with an online registration. Subsequent execution of the software is validated against this web service. A day counter is delivered in the license file for the Time Limited license.

A transport is sent to the Customer. The Customer applies the transport to Solution Manager, defining one SAP® satellite system to be profiled. If Solution Manager is not installed, it is deployed to the SAP® satellite system itself. The Customer runs a job. The job produces the scanned data for the analysis. Once the job is complete the resultant file is zipped by the Customer and sent back to BusinessGenetics for reporting and analysis.

Reporting programs and files are not included in this license.

Software maintenance is not needed for this option.

Perpetual

This is a permanent license. The Profiling Job and Reporting is installed in the customer's SAP® system landscape. Job scheduling and execution is not available with this license. The system is manually run.

The Customer creates and applies the transport to Solution Manager, defining one SAP® satellite system to be profiled. If Solution Manager is not installed, it is deployed to the SAP® satellite system itself. The Customer runs a job. The job produces the scanned data for the analysis. Once the job is complete the resultant file is analyzed by the Customer.

Reporting programs and files are included in this license.

Software maintenance is required for this option.

The Perpetual License requires BusinessGenetics Services for installation and training

Automated Execution

The Perpetual license can be extended for automating job scheduling, e.g., executing the job in defined time intervals, and automatically creating reports with email delivery of report files.

The Customer creates and applies the transport to Solution Manager, defining one SAP® satellite system to be profiled. If Solution Manager is not installed, it is deployed to the SAP® satellite

BUSINESSGENETICS FOR SAP® PROFILING

system itself. The Customer runs a job. The job produces the scanned data for the analysis. Once the job is complete the resultant file is analyzed by the Customer.

Reporting programs and files are included in this license.

Software maintenance is required for this option.

The Automated Execution License requires BusinessGenetics Services for installation and training
